Membership Registration System Update

The MBA approved the decision this winter to move away from the PlayerWeb platform for membership collections. PlayerWeb was essentially a failed experiment by the Canadian Badminton Community. We had many issues with registrations not syncing with Tournament Software (which is the platform used for all event registrations). All of the Provinces other than Alberta had already moved on to new options.

The MBA intended to move back to using Tournament Software for this (as had been done in the past). While Tournament Software isn't the greatest platform for this it does simplify the process (one profile instead of two and no syncing issues). Unfortunately, due to the sudden passing of a key employee this summer this transition was never completed. Virtual Reality (the company in charge of Tournament Software) was unable to solve this issue for us.

The MBA has had to return to PlayerWeb for the 2024-25 season. Part of doing that is switching to a new payment provider for that site which delayed things a bit further. Membership registrations are now open.

The most common issues related to PlayerWeb can be fixed by office staff. Once you have bought your 2024-25 membership if you find that you can't register for a tournament because Tournament Software isn't recognizing your membership, please reach out to [Corey](#). About 90% of the issues can be easily fixed by our staff, the other issues can be addressed by Tournament Software/PlayerWeb support. Those instances take a bit longer.

Sorry for any confusion or inconveniences with this process.

Corey Draper

Executive Director

Manitoba Badminton Association
